## **Williams-Pyro, Inc. Sells New Digital Voltage Detector**

*Fort Worth, TX—February 22, 2007—*Williams-Pyro Inc. is pleased to announce the availability of the Digital Voltage Detector (DVD) for immediate use on the flight-line. The Digital Voltage Detector is an innovative, modernized version of the “Beer Can” (467-2 and 467-3) voltage testers designed in the 1960s for military aircraft. This new stray-voltage detector, released after extensive testing, satisfies the requirements of the military by being reliable and field repairable and by increasing time between calibration cycles. Using updated technology and unit design, Williams-Pyro created this rugged voltage detector with extensive input from the most important user, the warfighter. The Digital Voltage Detector is an integral part of the preload armaments test set, and has an advanced microprocessor, LCD screen, and a user-friendly interface that is powered by two field-changeable AA batteries.

With this exciting new addition to their connectors and test systems product family, Williams-Pyro continues their extensive history of designing, testing, and manufacturing high-quality, innovative products. “This product will drastically improve the performance of maintenance personnel in the field while reducing operation costs,” says Brent Williams, Vice President and COO of Williams-Pyro. The Digital Voltage Detector is backwards-compatible with existing test kits and will be a drop-in replacement for the current voltage detectors. Williams-Pyro is set to ship the new product by the end of the second quarter of 2007.

#### **About Williams-Pyro, Inc.**

Founded in 1963, Williams-Pyro, Inc. is a woman-owned small business in Fort Worth, Texas, that designs, manufactures, and sells over 200 innovative, high-quality products, including AccuTag™ Vehicle Systems and StoveTop FireStop®—America’s leading automatic stovetop fire suppressor—as well as automated test equipment, cabling, and connectors for the aerospace, defense, and energy sectors. Visit [www.williams-pyro.com](http://www.williams-pyro.com) for more details.
