

## PopTop FireStop™: Your Fireman In A Can

PopTop FireStop enables users to protect themselves from costly and dangerous stove top grease fires. At the onset of an unwanted fire, simply lift and pull the tab on the PopTop FireStop and pour the fire suppressing powder on the fire. The product is durable and the perfect size to pack with camping and road trip supplies.

In 2007, U.S. fire departments responded to 399,000 home structures fires, resulting in 2,865 civilian deaths and \$7.4 billion in direct property damage. According to the National Fire Protection Association (NFPA), the leading cause of residential fires is cooking equipment. Unattended cooking is the number one cause of these fires. PopTop FireStop can help reduce these numbers.

### Features

- ▶ Contains 20 ounces of fire suppressant powder
- ▶ Un-pressurized can allows user to disperse powder, as needed
- ▶ Easy pull-tab top
- ▶ 5-year lifetime

### Benefits

- ▶ Manual operation allows user to put out a grease fire as it starts
- ▶ Easy to store
- ▶ Easy to take on camping trips
- ▶ Clean-up is central to fire location

### How Does PopTop FireStop Work?

1. Pull can tab.
2. Pour fire suppressing powder over flames.
3. Continue pouring until flames are extinguished.
4. Turn burner off, if safe to do so.
