

StoveTop FireStop® has been America's leading stovetop fire suppressor for over 30 years. It has been praised by numerous fire officials, property management companies, apartment personnel, and individuals. It has also been featured twice on the NBC Today Show, most recently on November 11, 2008.

Testimonials

“As the Fire Marshal for my county, I often see people lose all of their possessions to fire. The advent of smoke detectors and sprinkler systems in residential settings has helped save countless homes and lives, and now I know of another product that deserves the spotlight...the StoveTop FireStop. We've been able to see the StoveTop FireStop in action, extinguishing the fire every time. As a result of these fires, the most extensive damage has been some ruined pots. After the third fire I've seen extinguished with the StoveTop FireStop, I am committed to getting more complexes protected. With such an easy measure to take to combat kitchen fires, I don't think I'll have much trouble.”

**Christopher B. Goebel, Fire Marshal
Camden County Fire Rescue - Kingsland, GA**

“I wanted to let you know how great your product is. I had a stove fire which took only seconds to start. If I had not had the StoveTop FireStop on my stove, I would have lost everything. Thanks for making such a great product. Everyone needs a set in their home or business.”

**Tanya Lee, Homeowner
Hampton, GA**

“I am the Purchasing Coordinator for a large construction company in Leitchfield, Kentucky. We construct approximately 300 + apartment units a year. We also have a sister company that performs the maintenance on the units. They maintain over 3,000 units in Kentucky. We install Stove Top Fire Stops without fail in each and every unit we construct. To us, the Stove Top Fire Stop is as necessary as light fixtures, flooring, and paint.

It appears there was a fire yesterday in one of our units, and the Stove Top Fire Stops did their job perfectly. I asked the Maintenance Supervisor how many units we have had fires in that the Stove Top Fire Stops extinguished. His reply, “At least 12.” At least 12 units where the Stove Top Fire Stops have extinguished the fire, and completely changed the outcome of the fire.

How much have we saved? Conservatively, we have saved over \$300,000 in the three short years we've used the Stove Top Fire Stop! A set of Stove Top Fire Stops has changed the cost of a kitchen fire from a minimum of \$25,000 to less than \$500! There is no way to determine the actual cost savings. Multiple units could have burned, multiple tenants displaced, not to mention the possible loss of life. Thank you for making a wonderful product! My next order will include a set for my home and a set for all of my immediate family.”

**Gregg Hancock, Purchasing Coordinator
Clayton Watkins Construction Company, Inc. - Leitchfield, Kentucky**

“Before StoveTop FireStop was installed, a stovetop fire caused a \$245,000 loss to an apartment complex. Less than one year later, StoveTop FireStops were in place, and discharged on a stovetop fire in the same building, recently rebuilt from the previous fire loss. Cost = the price of StoveTop FireStop and a quick cleanup. We have no idea how many injuries have been prevented or lives have been saved as a result of our installation of the StoveTop FireStop.”

**Gordon W. Provost, Risk Manager
Boston Financial Property Management**

“Since installing StoveTop FireStops, we have not had a stove fire which has resulted in damage exceeding our \$2,500 insurance deductible. More importantly, there have been no injuries...I personally believe these units should be mandatory equipment in any multifamily dwellings, and have had more than one fire inspector tell me the same.”

**David L. Tune, Vice President
Dalcor Management, Inc.**

“Our department responded to a fire at an apartment complex. When we arrived we were told by the resident that a pan of grease had been left on the stove, but the fire was now out. When the manager of the apartment complex arrived to assess the damage, he showed us the StoveTop FireStop. Had it not been for this product, the property loss and possible loss of human life could have greatly increased. This is one product that I will be purchasing for myself and telling all of my friends and family about. In my opinion, the cost of the FireStop is extremely minimal compared to the alternative of an uncontrolled kitchen fire.”

**Rodney Blaylock, Firefighter
Benton Charter Township Fire Department - Benton Harbor, MI**

“We had a stove fire this past week in one of our apartment homes at The Village at Fairplain. Upon arrival, I discovered that the fire was already out by the time the fire department had arrived—thanks to the StoveTop FireStop. When I showed the fireman what had put the fire out, he was very impressed with the product. He even contacted our local newspaper, and they ended up doing a huge story on it. It was great PR for us, and this product truly does work. It saved both the resident and the company thousands of dollars in damage, and we ended up only replacing a stove hood and some paint. We have the product installed in all of our 178 apartment homes and are very happy with the result we have seen. Thank you!”

**Steve Cook, Manager
The Village at Fairplain Apartments, JVM Realty**

“I retired from the fire service at the end of 2005 after 37 years with the Department of Defense Fire Service. Our mission was to protect the military community and their families. We averaged around 14 kitchen fires a month throughout the region with extensive damage. I then installed the StoveTop FireStop in all the military housing. Your products activated and extinguished the fire in the early stages. I now live in Gig Harbor, Washington, and have the units in my home. I do believe in your units and was proud to have the chance to see them in action.”

**Dan Marshall, Retired Regional Chief
The U.S. Department of Defense Fire Service**

One of my accounts in Tidewater, Virginia, has 15 apartment sites, and when they had a stove fire, it was costing an average of \$11,000 in damages. Once they put in the StoveTop FireStops, the damage dropped to an average of \$1,000 (thus saving them \$9,000 on their \$10,000 policy deductible). They are believers.”

MiddleOak Specialty**

“My grandmother is 95, and yesterday she was cooking on her stool (she sits on it in front of the stove and cooks). Somehow, the stool tipped over, and she fell with the stove on ‘HIGH.’ By the time she crawled into the living room, there was a fire at the stove. Thanks to your product, the fire did not take her life and home. Today I ordered two more: one to replace the one that saved her life and one spare. I hope everyone cares enough to buy them to keep someone they love safe. ‘Thank you’ seem like such small words, but they come from a **very** thankful granddaughter.”
